## Summary:

I am a results-driven software engineer with over three years of experience in fast-paced startup environments. I have a proven track record of building scalable systems and spearheading projects that have garnered industry recognition—including winning the MgovAward and securing \$50,000 in funding. As the co-founder of RingAI, a B2B venture, I led the integration of advanced AI solutions and managed multi-platform communication systems. Recently, my focus has shifted entirely to artificial intelligence and deep learning. I am passionate about neural networks, computer vision, NLP, and large-scale AI models, and I am driven by the fusion of technical innovation with a deep understanding of mathematical and cognitive principles.

## Technical skills:

**Proficient & Actively Used:** Python (aiogram, PySide), Dart (Flutter), JavaScript (HTML, CSS)

**Backend:** Django, Django REST Framework, FastAPI, aiogram, WebSockets, gRPC, RESTful APIs

**AI & Machine Learning:** TensorFlow, PyTorch, scikit-learn, OpenCV, Transformers (Hugging Face), NumPy, Pandas, Matplotlib, Seaborn

**Used in Projects:** C++ (userver), C, Java, Go (Gin)

**Tools & Technologies:** RabbitMQ, Redis, Git, GitHub, Docker, Grafana, Prometheus, Twilio

**Development Methodologies:** SCRUM, Agile

**Theoretical Knowledge:** Data Structures & Algorithms, System Design, Monolithic & Microservices Architecture, Distributed Systems, Software Engineering Principles, Web & Mobile Architecture, Machine Learning Fundamentals, Deep Learning, Model Optimization, AI-driven System Design

## **Professional Experience**

### **Galaktika Learning Center**

*Teacher of Backend Development and Python Programming*

*July 2023 – September 2024*

- Taught Python syntax and basics, HTML, JavaScript, OOP, Django Framework, REST frameworks, and Aioogram bot development.
- Developed comprehensive curriculum and provided hands-on training to students.

### **LogoSmart**

*CTO and Backend Developer*

*September 2023 – December 2024*

- Led technology selection and integration for various projects.
- Collaborated effectively within a team and provided technical leadership.
- Gained extensive experience working with REST frameworks.
- Worked on developing Microservice architecture.

### **RingAI**

*Co-founder and Backend Developer*

*December 2023 - Present*

- Utilized Twilio for CALLs and voice communications and developed AI - based Bots for businesses.
- Designed and implemented Scalable-Backend systems with integrated AI solutions to enhance efficiency.
- Collaborated with cross-functional teams and analyzed Customer Support data for Optimization.
- Created new AI models, worked with Classification, LLM, NLP, Computer Vision

models.

- Tried to train CNN RNN's using keras.

## Education

### Inha University

*Bachelor's Degree in Computer Science*

*September 2023 - Present*

- Gaining extensive experience in hardware and software technologies. · Engaging in hands-on projects and practical applications. · Developing problem-solving skills through coursework. · Staying updated with the latest advancements in technology.

### Yandex

*Backend development*

*October 2024 – January 14 2025*

- Studied for backend development to enhance my current knowledge in backend, microservices and Database structure in big scale services, optimizing and scaling them. And Studied USERVER framework which is open-source backend framework developed by Yandex.

## Languages

- **Uzbek:** Native
- **English:** Advanced (IELTS 6.5)
- **Russian:** Advanced

## Soft Skills

- Effective Communication
- Team Collaboration
- Problem-Solving
- Leadership
- Adaptability
- Time Management
- Critical Thinking
- Creativity
- Self-Motivation
- Attention to Detail

## Hobbies

- **Swimming:** Enjoy staying active and maintaining physical fitness.
- **Reading Books:** Passionate about expanding knowledge and exploring new ideas through literature.
- **Watching Fantastic Movies:** Enthusiast of Marvel and DC films, appreciating creativity and storytelling in the genre.
